WooCommerce Integrate

WordPress permalinks must be set to something that is easily human readable at: **Settings** > **Permalinks**. Day and name is a great default, but anything aside from Plain should work

Common Settings	
🔿 Plain	https://wpnovisad.test/?p=123
Day and name	https://wpnovisad.test/2022/05/24/sample-post/
\bigcirc Month and name	https://wpnovisad.test/2022/05/sample-post/
O Numeric	https://wpnovisad.test/archives/123
O Post name	https://wpnovisad.test/sample-post/
O Custom Structure	https://wpnovisad.test /%year%/%monthnum%/%day%/%postname%/

The WooCommerce REST API works on a key system to control access. These keys are linked to WordPress users on your website.

General Products Tax	Shipping Payments	Accounts & Privacy	Emails Advance	ed	
- CONTRACTOR NEEDED IN A SECOND		and a second second			
Page setup REST API Webhooks	Legacy API				
REST API Add key					
					Search key
Bulk Actions \$ Apply					1 item
Description	Consumer key ending in	User	Permissions	Last access	
TestKey	a798f93		Read/Write	Unknown	
Description	Consumer key ending in	User	Permissions	Last access	
Bulk Actions \$ Apply					1 item

To create or manage keys for a specific WordPress user:

- 1. Go to: WooCommerce > Settings > Advanced > REST API.
- 2. Select Add Key. You'll be taken to the Key Details screen.

Page setup REST API Webhoo	ks I	Legacy API
Key details		
Description	0	
User	8	Search for a user
Permissions	0	Read
Generate API key		

- 1. Add a Description.
- 2. Select the User you would like to generate a key for in the dropdown.
- 3. Select a level of access for this API key:
 - Read access,
 - Write access, or;
 - Read/Write access.
- 4. Select Generate API Key, and WooCommerce creates API keys for that user.
- 5. Now that keys have been generated, you should see Consumer Key and Consumer Secret keys, a QRCode, and a "Revoke Key" button.
- 6. The Consumer Key and Consumer Secret may be entered in the application you'll be connecting to using the WooCommerce REST API. The the app should also request your URL.
